## OBJECTIVE

---

Ambitious MCA student with a strong foundation in Full-Stack Development and Data Structures. Proven ability to build scalable web applications through academic projects using ReactJS and NodeJS. Seeking a Software Engineering internship or entry-level role to contribute to innovative technical solutions.

## EDUCATION

---

**Master of Computer Application**, Graphic Era Deemed To Be University Expected 2027  
Relevant Coursework: Machine Learning, Data Structure

**Bachelor of Computer Application**, Kurukshetra University 2022 - 2025

## PROJECTS

---

**True Cost Tech:** React, Node.js, AI APIs - Built an AI-powered cost analysis platform to estimate and compare pricing. - Designed interactive UI for structured insights and decision-making. - Implemented scalable backend logic for real-time calculations. ([Try it here](#))

**TripSphere AI – Smart Travel Planning Platform** Tech: React, Node.js, AI APIs - Built an AI-powered travel planning platform generating personalized itineraries. - Implemented budget-based recommendations and cost estimation features. - Designed dynamic UI with filtering, sorting, and real-time data updates. ([Try it here](#))

**Windoor ERP** Tech: MERN Stack - Developed a role-based ERP system for managing business workflows. - Implemented authentication, dashboard, and database operations. - Designed scalable APIs and structured data handling. ([Try it here](#))

## EXPERIENCE / LEARNING

---

- Built and deployed multiple web applications using modern frameworks.
- Actively learning advanced JavaScript frameworks and AI/ML technologies.
- Practicing Data Structures and Algorithms for technical interviews. Exploring 3D web development using Three.js and WebGL.

## ADDITIONAL INFORMATION

---

- Strong problem-solving mindset and fast learning ability.
- Interested in product-based companies and high-impact roles.
- Open to internships and full-time opportunities .
